

Create a kidney mass action plan with your healthcare team

Talking with your healthcare team can help you better understand your kidney mass

Your healthcare team is here to answer any questions that you may have about your kidney mass and discuss options for managing or treating it. These questions can help you make informed, shared decisions about the best plan for you.

Understanding my kidney mass

Is my kidney mass fluid filled (cystic) or solid?

How big is my kidney mass?

How does the size of my mass determine which treatments are available?

Diagnosing kidney masses

What options are available to diagnose my kidney mass, and how accurate are they?

What are the risks and benefits of each diagnostic option?

Could my kidney mass be clear cell renal cell carcinoma?

Does my kidney mass require treatment, or can it be monitored to see if it grows?

Kidney masses needing intervention

What treatment options are available for my kidney mass?

Why are these treatment options recommended for me?

How long will my recovery take?

What are possible treatment side effects or complications?
